Hawthorn
Seam Mineral

Just think, from the moment the heart starts beating to the moment it stops, it will beat on an average of two and a half billion times, without pause and without rest.

When we combine the pressures of modern life, stress, bad eating habits and environmental pollution, we have to ask the question Are we really looking after our most important organ? Will we live long enough for our hearts to beat two and a half billion times? Many don't. BUT YOU CAN.

At Seam Mineral we don't believe in medicines or cures. We believe that with the introduction of good food and safe supplements in our daily diets, we can live a long, healthy and fulfilling life.

Sea Minerals are the finest and most balanced source of minerals that nature has to offer. Unlike other ionic minerals, Sea Minerals are sourced from living breathing oceans where concentrations of minerals are perfectly engineered by nature to support a vast array of different life forms.

Laboratory tests done in Australia, the United States and Europe have demonstrated that Sea Minerals are not only a viable source of electrolytes, both macro (major) and trace (minor), they are also the best all round naturally balanced mineral product available.

Innovative natural technologies have enabled us to combine the power of Sea Minerals with the Hawthorn Berry and Carica Papaya Extract without the use of any chemicals or damaging heat. This subtly acting formula has been specifically created to promote true cardiovascular health.

Hawthorn Berries have been used for generations for their curative and nutritional properties. The cardiovascular and circulatory support that the Hawthorn Berry offers is now universally accepted by the natural health community.

Select hand picked Hawthorn Berries are blended with the world's finest Ocean Derived Sea Minerals and Papaya Extract over a number of months to produce only the finest hand crafted nutritional products.

Life is good when you're feeling great.

Best results are achieved by following directions. You may notice a small amount of pulp residue settle in the bottom of the bottle. This is a natural by-product. Do not remove. Shake bottle till pulp is dispersed.

Dosage:

Adults: 5mL / 1 teaspoon daily, best taken at evening mealtime diluted in juice or water

Children: 5 drops daily diluted in juice
